

An Internship Report

Of

Web Development

Submitted

To

School of Computer Science and Engineering

IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of

B.Tech (CSE)

By

Name of Student: SOUMYA SINGH

Roll No.: 25SCS1003002659

Academic Year: 2nd Year

Batch : 2CSE34

2026-2027

CANDIDATE'S DECLARATION

I, SOUMYA SINGH, do hereby declare that the internship report titled “Web Development Internship” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering. All the references have been quoted and I have not taken as such any material from any other source. I affirm that this report is my own and has not been submitted to any other institute for any degree/diploma requirement, and further I shall be solely responsible for any kind of copyright violation in this regard.

Signature:- Soumya Singh

Student Name: SOUMYA SINGH

Roll No.: 25SCS1003002659

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout the Internship Program. I am thankful for their aspiring guidance, invaluable constructive criticism and friendly advice during this work. I am sincerely grateful to them for sharing their truthful and illuminating views on a number of issues related to this work.

I would like to thank Codec Technologies Pvt. Ltd. and Dr. Anurag Shrivastava for providing me the opportunity and the structured platform to learn and gain hands-on exposure in the domain of Web Development. I am also thankful to my institute, IILM University, Greater Noida, and the faculty of the School of Computer Science and Engineering, for their continuous support and encouragement.

I express my gratitude to my parents for their blessings.

Signature: Soumya Singh

Internship Offer Letter

INTERNSHIP OFFER LETTER

Dear Soumya Singh,

We are pleased to offer you a 1 Month Internship as Project Intern at Codec Technologies, a global platform dedicated to empowering learners and connecting diverse talent to create meaningful career opportunities worldwide. Codec Technologies delivers dedicated IT and business consultancy services across 27+ countries, empowering global innovation and strategic growth.

Internship Details:

- Designation : Web Developer Intern
- Location & Mode: Pan India, Hybrid
- Duration : 01/07/2026 to 31/07/2026
- Reporting to : Assigned Project Head(s)

This program provides an immersive experience, enabling you to gain industry-level knowledge and acquire valuable skills. Exceptional interns may also qualify for a scholarship award based on weekly performance reviews conducted by project supervisor.

If you accept this offer and the terms above, please complete your assigned projects and training tasks on our platform and via email.
Best regards,

Sincerely,
Dr. Anurag Shrivastava,
Codec Technologies India
NCS ID: E19E86-0116588288923
Date Of Issue - 01/07/2026

Dr. Anurag Shrivastava

4. PROJECT DESCRIPTION

4.1 Introduction

This report presents a detailed account of the 1-Month Internship undertaken at Codec Technologies Pvt. Ltd., in the domain of “Web Development”. The internship was carried out from 01 July 2026 to 31 July 2026, in a hybrid, Pan-India mode, as part of the requirement of the Bachelor of Technology (Computer Science and Engineering) programme at IILM University, Greater Noida. The primary aim of this internship was to bridge the gap between classroom programming fundamentals and the practical, hands-on skills required to design, build, and deploy complete, real-world frontend web interfaces.

The internship followed a structured, week-wise curriculum that combined conceptual learning in HTML, CSS, and JavaScript with hands-on project work, culminating in two complete, deployable web projects: an Interactive Calculator application and a Personal Portfolio website. On successful completion of all the requirements, an Internship Completion Certificate was awarded by Codec Technologies Pvt. Ltd. under the AICTE & ICAC approved internship program listed on the National Internship Portal.

4.2 Organization Profile

Codec Technologies Pvt. Ltd. is an ISO 9001:2015 certified, global IT and business consultancy platform, dedicated to empowering learners and connecting diverse talent to create meaningful career opportunities worldwide. Codec Technologies delivers dedicated IT and business consultancy services across 27+ countries, empowering global innovation and strategic growth. The organization is a recognized Google for Education Partner and conducts its internship programs under the AICTE & ICAC approved framework, listed on the AICTE National Internship Portal, to help engineering students strengthen their employability and gain practical exposure to industry-relevant web development practices.

4.3 Problem Statement

Although a large number of engineering students learn programming fundamentals during their academic coursework, very few get hands-on exposure to building complete, real-world web interfaces from scratch. Writing correct code in isolation is

only one part of web development; structuring a page semantically, styling it to be visually consistent and responsive, adding interactive logic, and deploying it for public access is an equally important and often overlooked skill set. The problem addressed by this internship was to understand and practically implement the complete, end-to-end process of frontend web development — from page structure and styling to interactivity, version control, and deployment.

4.4 Project Objectives

- To understand the complete frontend web development lifecycle, from planning to deployment.
- To build semantic, well-structured page layouts using HTML5.
- To apply modern CSS3 styling techniques, including Flexbox and Grid, for visually consistent interfaces.
- To gain hands-on experience with JavaScript logic, DOM manipulation, and event handling.
- To design responsive, mobile-friendly user interfaces that adapt across screen sizes.
- To learn version control using Git and manage source code on GitHub.
- To deploy and publish complete, portfolio-quality web projects for public access.
- To apply all the above concepts in real, end-to-end projects: an Interactive Calculator application and a Personal Portfolio website.

4.5 Scope of the Project

The scope of this internship spans the core frontend web development pipeline — starting from structuring a web page with semantic HTML, styling it with CSS, and adding interactivity with JavaScript, through to version control and public deployment. It covers the development of two client-side, static web applications: an Interactive Calculator and a Personal Portfolio website. The internship was limited to frontend development in a hybrid, self-paced virtual/lab environment provided by Codec Technologies and did not involve backend, database, or server-side integration.

4.6 Technologies and Tools Used

- Languages: HTML5, CSS3, JavaScript (ES6)
- Editor & Workflow: Visual Studio Code, Live Server
- Version Control: Git, GitHub
- Deployment: GitHub Pages / static hosting

4.7 Key Projects Undertaken

Project 1: Interactive Calculator App

A fully functional web-based calculator built to strengthen core JavaScript logic and DOM manipulation skills, handling arithmetic operations through a clean, responsive interface. Key features include a real-time input display with click and keyboard support, core arithmetic operations (addition, subtraction, multiplication, division), clear/reset and error-handling for invalid expressions, and a responsive layout styled with CSS Flexbox/Grid. Skills demonstrated: JavaScript logic, DOM manipulation, event handling, and UI styling.

Project 2: Personal Portfolio Website

A personal portfolio website showcasing profile details, skills, and projects, designed to present a professional online presence and serve as a live demonstration of frontend capabilities. Key features include sections for About, Skills, Projects, and Contact, a responsive, mobile-friendly multi-section layout, custom CSS styling for a clean visual identity, and publication with version control on GitHub. Skills demonstrated: responsive design, semantic HTML, CSS styling, and Git/GitHub deployment.

4.8 Methodology / Weekly Timeline

Table 4.1: Weekly Timeline of the Internship

Week	Module	Description
1	Onboarding & Fundamentals	Program onboarding, HTML/CSS refresher, and environment setup with VS Code and Git.
2	JavaScript & Interactivity	Core JavaScript concepts, DOM manipulation, and event-driven logic building.
3	Project Build — Calculator	Designed and developed the Interactive Calculator application end-to-end.
4	Project Build — Portfolio & Wrap-up	Built the Personal Portfolio website, deployed both projects, and completed final review.

4.9 Expected Outcomes

- Ability to independently structure and style a complete web page using semantic HTML and modern CSS.
- Practical understanding of JavaScript programming, DOM manipulation, and event-driven interactivity.
- Hands-on exposure to building responsive, mobile-friendly user interfaces.
- Capability to manage source code and collaborate using Git and GitHub.
- Skill to deploy and publish complete, portfolio-quality web projects.
- Two completed, end-to-end frontend projects: an Interactive Calculator application and a Personal Portfolio website.

4.10 Certificates of Completion and Communication Proof

The Internship Offer Letter and the Internship Completion Certificate issued by Codec Technologies Pvt. Ltd., confirming successful completion of the 1-Month AICTE & ICAC Approved Internship Program in Web Development (Web Developer Intern), are attached in Chapter 3 of this report.
